About me

I'm an enthusiastic, creative, people-oriented early career IT student. I would like to use and improve the knowledge I have gained from my studies and my own projects on the field of full stack software development.

Education

Lehel Vezér Secondary School Jászberény   2014 – 2018
Informatics and biology class
Advanced physics final exam

Budapest University of Technology and Economics   2019 – 2023
Software engineering
Software developer specialization

Experience

Software Engineer Intern   Jul 2022 - Present
Bosch, Budapest
I am currently working on a 3D parking assistance system, based on surround vision technology.
